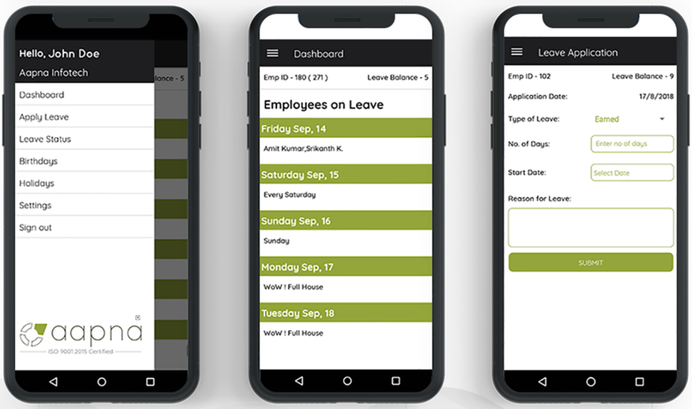
Human Resource Information System

Apply and View Leave

Monthly Display of Employees Birthday

Introduction

HRIS AAPNA provides a flexible system with very professional services. The HRIS AAPNA app is an effort to extend the AAPNA PMS Web App to the mobile platform and thus bypassing the need for a static workstation for carrying out these operations like Apply for Leave, get notifications for Employees on leave, Birthday calendar and notifications, Annual holidays etc.



Challenge

AAPNA PMS is a web-based tool which is being used by AAPNA team to apply leave or receive birthday or holiday notifications only when they login from their workstation.

This is a time-consuming activity and causes delay for employees to apply for a leave, in case of emergency.

Key Features

- Monthly display of Employees Birthday
- Leave Management by Managers
- No Static workstation required
- Settings option for changing the account password
- Apply and view the balance leave
- Displays the list of Holidays
- Status of the Leave can be viewed and action of approve and reject
- User Admin can view employees who are on leave for the upcoming 2 weeks

Technology Used
