Psychological Publications, Inc. wanted to take their business model online, which is built around aiding counselling professionals & its’ renowned personality test (Taylor Johnson Temperament Analysis). Our digital transformation solution includes an eCommerce store, an Assessment Engine, Inventory Management, and more.
Taylor Johnson Temperament Analysis® (T-JTA)
Personality Assessment for Individuals, Couples, Families and Groups.

About the T-JTA
The Taylor Johnson Temperament Analysis® (T-JTA) is a widely used personality assessment for individual, pre-marital, marital, and family counseling. The T-JTA measures all dimensions of personality (bipolar traits) that are important in individual adjustment and interpersonal relationships. For over 50 years, the T-JTA has been used by thousands of counseling professionals in a wide array of settings in the U.S. and around the world to help people understand themselves and others in their lives.

T-JTA Benefits
- Summarizing: identifies problems that are difficult for clients to articulate, fostering awareness and insight.
- Accessibility: produces graphical results that are easy for counselors to explain and clients to understand.
- Efficient: brings to light core issues and establishes rapport within hours instead of months.
- Flexible: Can be taken online using any internet-connected device, or offline using paper materials.
- Valid and Reliable: backed by 50 years of research, multiple correlational studies, and frequent restandardization.

A Profile is Worth a Thousand Words
Use an emotional way, the T-JTA Profile displays in graphical terms the landscape of one’s temperament. Its visual presentation is immediately accessible and communicative to clients, making it an ideal visual aid for use within the counseling session. Combined with detailed counselor report, the T-JTA gives you results that are equal parts concise and comprehensive. For both counselor and client, the T-JTA accomplishes in one sitting what can otherwise take months to achieve.

CASE STUDIES

KALILAPUR
In May 2013, 18-year-old woman, Tanu, visited the police office in Kalilapur. Two days later, her grandfather, Kalil, accusing the boy behind Tanu's disappearance. Tanu said that when her grandmother was 15, the boy left her village in the night. Kalil was arrested after she asked for the boy to be brought back to the village again. Tanu was rescued and her family was able to reunite.
An online store for a company with over two decades of experience in fashion and apparel business across Europe and the US, looking to sell quality bags, belts, scarves and fashion accessories to its customers at reasonable prices.

Shakti Foundation is a very well-known foundation that works to facilitate India’s transition to a cleaner energy future.
AEEE is a policy advocacy and energy efficiency market enabler dedicated to meeting India’s commitments to the 2030 nationally determined goals (NDC) and UN sustainable developmental goals (SDG).
AEEE office is now LEED Platinum (ID+C) certified

Transitioning to a Climate Resilient & Energy Secure Future

Our Core Values
- Respect for all
- Integrity at all times
- Synergy within AEEE
- Excellence at work

Our Vision
Transition to a Climate Resilient & Energy Secure Future

Our Mission
- Foster a culture of energy efficiency in India
- Create an Energy Transition by working across industry, government, and society to fulfill the dual goals of reducing energy consumption and promoting energy efficiency
- Accelerate impact as a policy player through leadership and research to meet India's 2030 Nationally Determined Contributions (NDC) and 2050 sustainable development goals (SDGs)

Buildings and Communities
- The building sector in India is experiencing rapid growth and is set to add about $150 billion of new area annually. AEEE is playing a pivotal role in this by promoting energy efficiency and sustainability standards. AEEE has also been proactive in advocating for building codes and regulations that encourage green building practices.

Industrial Energy Efficiency
- The industrial sector contributes to almost 60% of the total greenhouse gas emissions in India. AEEE is working to raise awareness about the potential for energy savings in the industrial sector. This includes promoting energy-efficient technologies and best practices, as well as encouraging companies to adopt renewable energy solutions.

State and Local Actions
- The state and local government play a crucial role in promoting energy efficiency and sustainability. AEEE is working with state governments to develop policies and programs that encourage energy conservation and the adoption of clean energy solutions.

Industry Platform & Business Creation
- AEEE is a convening platform bringing key stakeholders - industry, government, and society - together to strategize, design, and implement energy-efficient solutions.
