

# TEE - TIME AGGREGATOR

Sunya  
@ the Golf Course

## Introduction

The application integrates multiple teesheets and payment processes alongside supporting legacy token system.

## Key Challenges

A US based Teetime Aggregator was facing following challenges :

- No integration between their platforms (Marketplace and Membership) causing concerns from end-users to maintain multiple profiles
- Limited integration with Teesheet providers and Payment Processors and no support for Legacy Tokens which was hindering their acquisition and growth
- UX/CX experience was not engaging for end users

## Solution Provided

 <p>Strengthened QA capability to ensure more stable builds</p>	 <p>Development of new features and modules on both Microsoft and Mobile platform</p>	 <p>Implemented QA Automation of specific scenarios to reduce manual efforts</p>
 <p>Delivered and implemented new UX/CX for end-customers</p>	 <p>Added single sign-on capability and seamless integration between all platforms giving end-customers easy access and more visibility to the offerings</p>	 <p>Integrated Multiple New Teesheets and Payment Processors quickly along with support for Legacy Tokens</p>

## Outcome

 <p>Extended on-boarding of Multiple courses which are on new Teesheets/ Payment Processors which opened up new business avenues and increased profits</p>	 <p>Seamless linking for end customers between all Platforms and enabling visibility of offerings - increased revenues</p>	 <p>UX/CX experience for end-users has majorly improved and screen time has increased</p>
