

DELIVER-ME AUSTRALIA

END-TO-END FREIGHT MANAGEMENT PLATFORM

Overview

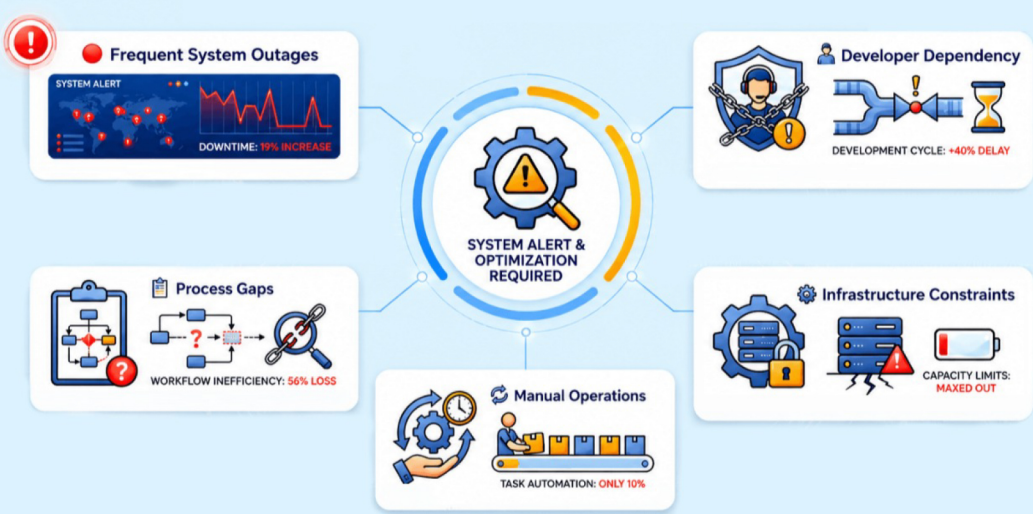

Industry: Logistics & Freight Management
Engagement Model: Monthly Retainer (Time & Material)
Region: Australia
Platform: End-to-End Freight Management SaaS

Introduction

Deliver-Me's freight management platform was inherited from a previous technology vendor in an unstable condition, causing frequent production issues and operational inefficiencies.

KEY CHALLENGES

Strategic insights into critical business obstacles hindering growth and efficiency.

Our Solution

AAPNA implemented a structured transformation program focused on platform stability, process governance, and operational independence.

Results & Business Impact

The transformation delivered significant improvements in reliability, efficiency, and scalability.

Team Behind the Success

Driving stability scalability & Innovation Together

Technology Used

Conclusion

- Transformed an unstable platform into a scalable, high-performance freight ecosystem.
- Reduced production incidents to near zero, improving reliability and operational efficiency.
- Enabled self-service operations and predictable delivery through structured governance.
